Maryna Rak

Senior Product Designer | AI Products & Complex Workflows

maryna.rak01@gmail.com · LinkedIn · Portfolio

SUMMARY

Senior Product Designer with 7+ years of experience designing complex products and workflows, from problem definition through research, testing, and release. For the last two years, I've focused on AI products, from a support assistant with human handoff to Pagecraft, a SaaS tool for online sellers.

PROFESSIONAL EXPERIENCE

Senior Product Designer — Ubisoft International

April 2022 – Present

Paris, France · Remote

I design across several player-facing products, including the Help and Bug Reporter tools used by more than 2 million players a year. My work includes an AI support assistant with handoff to human agents.

- Reduced tickets routed to one support topic by up to 24% by adding an AI answer step to the support contact flow.
- Reduced invalid or incomplete bug reports by 20% by introducing structured report forms.
- Redesigned the Help platform's navigation and information architecture.
- Design multi-step reporting flows from discovery through release, translating user needs and product requirements into journeys, interactions, and edge cases.
- Work with product managers, engineers, and QA to explore solutions, test flows, and prepare designs for implementation.
- Help plan design work and integrate the design process into team workflows.
- Contribute components and guidelines to the shared design system and apply WCAG accessibility standards.

Senior UI/UX Designer — Ubisoft Ukraine Studios

April 2020 – April 2022

Kyiv, Ukraine

Designed internal tools that marketing, procurement, and production teams use to manage requests, approvals, and tasks.

- Created wireframes, prototypes, and high-fidelity UI for internal platforms and web tools.
- Built UI components in HTML and CSS for in-game overlays across PC, mobile, Xbox, and PlayStation.
- Contributed reusable components and patterns to the internal design system.
- Applied WCAG principles for contrast, keyboard navigation, and interaction states.

UI/UX Designer — Ubisoft Ukraine Studios

June 2019 – April 2020

Kyiv, Ukraine

- Designed interfaces for internal tools and web applications.
- Built responsive UI components in HTML and CSS with developers.

Web Designer — LynxSoft

June 2017 – April 2019

Kyiv, Ukraine

- Designed client websites and implemented the designs in HTML and CSS.

Web Designer — UkrKanProm

June 2015 – April 2017

Poltava, Ukraine

- Designed website layouts and marketing pages for company products.

INDEPENDENT & FREELANCE WORK

Designer & Builder — Pagecraft

April 2026 – Present

Pagecraft is a live AI tool that helps small online sellers create product pages in two stages: selling content and a product photo gallery.

- Designed and built the live MVP with Lovable and Claude Code.
- Content: generates product page copy from a product URL or the seller's own description.
- Images: builds a photo gallery from the seller's own photos or from images imported from a product URL. Defined shot lists for 10 product categories to show sellers which shots are missing.
- Designed an AI photo editor with version history, so sellers can review edits and the original image is never overwritten.
- Adapted the full workflow for mobile.
- Created custom Claude skills to support my design and build workflow.

Lead Product Designer — Roots Marketplace

2025 – February 2026

Freelance · Remote

Seller CMS and customer storefront for a marketplace.

- Designed seller tools for managing product listings, pricing, inventory, and variants.
- Split product creation into modular CMS sections to make the workflow easier to navigate.
- Designed storefront product pages that reflect the information sellers enter.

SKILLS

Product design: User research, usability testing, interaction design, prototyping, information architecture, integrating the design process into team workflows.

Design systems & accessibility: Design systems, documentation, WCAG accessibility.

Tools & technologies: Figma, Figma AI, Miro, Jira, HTML, CSS, Claude, Claude Code, Lovable, ChatGPT.
